Election/Restrictions

This application is in condition for allowance except for the presence of claims 10-17 to an invention non-elected without traverse. Accordingly, claims 10-17 have been cancelled.

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the abstract, line 8, change "consisting of" to –having--.

Cancel claims 10-17.

2. The following is an examiner's statement of reasons for allowance:

The prior art does not teach or fairly suggest (taken in combination with the other claimed features) an effective dielectric material section made by stacking dielectric ceramic layers, that include a main crystal phase comprising at least BaTiO₃ as a main component and a secondary phase comprising mainly SiO₂ which forms grain boundary and triple point boundary, an external cover dielectric layers that are formed on the upper and lower surfaces in the stacking direction of the effective dielectric material section and include a main crystal phase and a secondary phase comprising at least the same components as those of the dielectric ceramic layer, wherein the external cover

dielectric layers comprises ceramics having lower sinterability than the dielectric ceramic layers of the effective dielectric material section (claims 1-9).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

5,995,360 – discloses a multilayer ceramic capacitor comprising barium titanate and a silicon dioxide side component.

5,731,950 – discloses a multilayer ceramic capacitor comprising a barium titanate having an amount of silicon.

6,144,547 – discloses a capacitor having an alumina cover layer.

6,229,686 – discloses a capacitor having CaZrO_3 outer cover layers and BaTiO_3 core layers.
